scientell

science, in other words

Scientell is a science communication company that transforms technical information into clear messages to increase the impact of science.

We specialise in synthesising scientific and technical information into clear and useable material for a variety of audiences. We are committed to clarity and accuracy, and work closely with our clients to ensure we meet their needs. Our work is based on the best available science and information.

We are experienced in:

- science writing and editing
- workshop planning, facilitation and delivery
- communication training
- graphic design
- video and animation production
- development of communication strategies.

Creative science communication services

OUR **SERVICES**

Writing: we transform complex information into clear text for audiences such as policy makers, community groups and young people. We create content for brochures, factsheets, reports, case studies, education material, websites and more.

Editing: we improve the structure, readability, flow, language and grammatical consistency of technical documents to ensure they are clear and understandable.

Graphic design: we create engaging science visuals, such as custom infographics and diagrams, as well as profesionally designed attractive products.

Communication planning and strategies: we prepare communication and engagement plans to maximise impact and provide strategic communication advice to clients.

Workshops facilitation: we facilitate and deliver events, workshops and meetings, then summarise findings and recommendations.

Communication skills training: we deliver courses to help clients communicate for impact and deliver presentations for a range of audiences. We provide advice and tips, recommendations on structure and style, hands-on experience and individual feedback.

Video and animation production: we produce high-quality videos and animations that clearly and succinctly convey client messages through images and visualisations.

OUR **CLIENTS**

Scientell has successfully completed projects for clients including Commonwealth, state and local governments, CSIRO, universities and research centres, industry, non-government organisations, academic associations and professional societies, in Australia and overseas.

OUR **COMPANY**

Scientell has offices in Melbourne, Canberra and Adelaide, and we work in all Australian jurisdictions and internationally.

OUR **PEOPLE**

Scientell comprises 4 experienced science communicators. Each member of the Scientell team has a background in, and a love of, science, technology and the environment. We also work with a range of expert support staff and sub-contractors, including editors, designers, videographers, animators and photographers.

SIMON TOROK worked in communication for more than 25 years at CSIRO in Australia and the Tyndall Centre for Climate Change Research in England. He has a PhD in climate science.

SONIA BLUHM worked as a science communicator and knowledge broker at CSIRO and has experience working on climate science and environmental issues and policies for the Australian Government.

ALYSHA HUXLEY is an experienced science writer and project manager. She has extensive media experience describing science information and breakthroughs.

CINTYA DHARMAYANTI is an experienced science communicator and project manager who has a background in health and medical research. She has a PhD in pharmaceutical science.
